Bivalent COVID Booster was developed to provide protection against the COVID-19 original strain & the Omicron variant.

Bivalent COVID Booster Eligibility: Age 12 & up.

Recommended to wait 6 months from last dose or COVID infection.

However individuals at increased risk can get the bivalent vaccine 3 months after last dose or COVID infection.

Must have primary vaccine series (usually 2 doses)
before receiving the bivalent booster vaccine.

Complete COVID eligibility criteria visit: protectmb.ca
